Notes:

Approval of the minutes of the previous ORC Steering Committee call

Corrected the date for the next meeting and approved.

ORC Status Update + CRA Expert Group meeting

- Membership - 63 members with 2 in the signing process. Good contacts made at CES and FOSDEM, but we are aware of the timing to get manufacturers joining the WG.
- We'd like to get feedback on the process implemented to contribute to the Open Digital Ecosystems.
- We are streamlining the process to contribute to established assets like the FAQ.
- Position papers will also be a key resource in 2026, we are working on the first, but it will be a very useful tool to engage with institutions.

It was shared the draft agenda for the CRA Expert Group meeting. We are expecting documents from the EC, especially those related to guidance. In any case we have already organised a WG call to work on the preparation of the meeting on the 23rd of February. There will be a presentation of the work done in the attestation project. ENISA will have a significant role in the meeting, presenting SBOM work, the reporting platform and the SME support. We will focus on the first two elements.

2026 Implementation Plan

It was introduced the different proposals for executing the concepts included in the program plan. The

details are included in the slides. It was also introduced Marta Garcia to the team, since she will be supporting the working group in our outreach to member states and some trade associations.

Code and Compliance FOSDEM Edition retrospective

These are the lessons learned and feedback based on the EF team perspective and the event feedback survey done during the closing of the event.

- Too many talks, it was a bit intense and more networking time would be welcome. For that we need to balance better talks, workshops and panels.
- We sold out, and the two-tier ticket worked pretty well; we need to adjust it for the next time the number of lower-tier tickets.
- It will be very helpful to have a program committee to support on focusing the event.

In the open discussion, the plan for future Code&Compliance and the audience we are trying to reach. Currently, it is our community event, and we need to keep it as such. We will be developing other events to reach out to other industries and different types of companies. Those will help us to increase our outreach.

The most important aspect is to keep it relevant for our community and a tool to communicate our work and gather more organisations that may join the working group.

2026 implementation plan

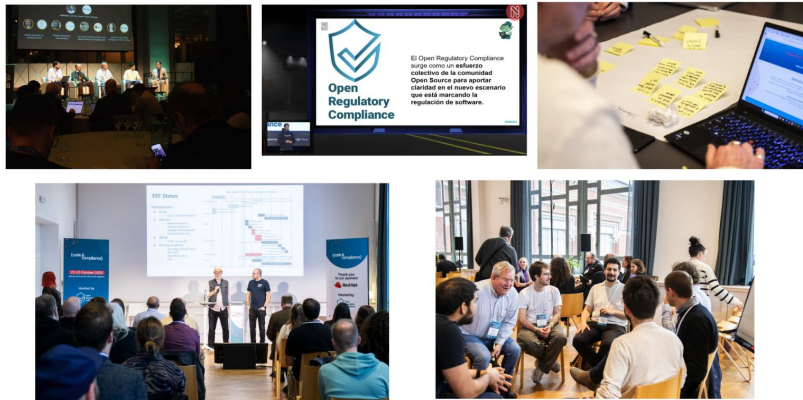

Thought Leadership - Events

{code & compliance}

The events are a key element as presented in the marketing plan.

Plan for 2026:

- **F2F events**
- **Virtual events** - Focusing on engaging with industries not yet involved in the ORC but impacted.

Thought Leadership

The whole environment is already set and there are only a few issues to be closed to launch Version 1.0.

Plan for 2026:

- **Sources of information:**
 - CRA Expert Group.
 - Standardization work.
 - Official EC documents.

Topics requiring additional clarification by the European Commission

Training

RECORDING

- Maximizing the impact of ORC work is key to develop a sustainable ecosystem.
- We will be launching training courses addressing
 - Intro to the CRA
 - How it impacts manufacturers, and what they can do.
 - How open source communities can help in CRA implementation.

Technical work

Attestations

- Open source projects **support to manufacturers to comply** with the CRA.
- The **elements and type of attestations**.
- **Sustainable model** to support cybersecurity posture of open source projects.

Due diligence

- Manufacturers approach towards CRA compliance when consuming open source.
- How attestations can be consumed and what is the relationship set with the issuer.
- How product type affects due diligence obligations.

Institutional engagement - EC + Agencies

ORC is the reliable partner to work with to achieve CRA objectives.

- CRA Expert Group
- ENISA:
 - SBOM
 - Reporting platform
- ECCC
 - ATLAS

ECCC 
EUROPEAN CYBERSECURITY
COMPETENCE CENTRE

Institutional engagement - EU member states

- Prioritize our approach.
- Support them in providing inputs to help develop their duties.
- Consider institutions as a target community, also for the training materials.

Representativity

Grow the membership base addressing:

- Vertical domains that consume open source, but they need support to comply.
- Develop synergies with other Eclipse Foundation WGs.

Develop new relationships based on:

- Assets developed by the ORC community:
 - FAQ
 - Attestations
 - White papers
- Training materials
- Opportunities derived from new regulations.

FOSDEM EDITION

Key learnings

01

Program

- Too intense - many talks
- More breaks and networking opportunities
- Talks, panel, workshop balance

02

Attendees

- Sold out in advance (120+ attendees)
- Two tiered ticketing worked well (will limit lower tier next time)
- Collocated with FOSDEM works well (will look for event to collocate for fall event)

03

Other aspects

- More sponsorship needed for next event
- Program committee
